

Dear Reviewer

We appreciate your thoughtful review. We address all comments point-by-point in the following.

1. To introduce the characteristics of DLBCL involving multiple muscles by ultrasound examination
 - We commented the characteristics of ultrasound examination of muscular lymphoma and its limitation in discussion section and added references (the second paragraph, page 7 and reference No. 13~14)

2. We shortened the title to meet the requirement of the journal ("Disseminated soft tissue diffuse large B-cell lymphoma involving multiple abdominal wall muscles: A case report")

Sincerely,

Jae-Yong Kwak, MD, PhD
