Nov 18, 2020 · Health care professionals may wonder when to order a liver biopsy or refer a patient to a hepatologist. I would suggest the following tips about when to refer patients to a liver specialist. Patients with an ALT in the 40s or above definitely have fat in the liver and are at risk for NASH, especially if they have type 2 diabetes and obesity.

## Fatty liver disease in diabetes mellitus

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4405411>

Jan 03, 2015 · Non-alcoholic fatty liver disease (NAFLD) is highly prevalent in type 2 diabetes mellitus (T2DM), likely reflecting the frequent occurrence of obesity and insulin resistance in T2DM. NAFLD also can occur in type 1 DM (T1DM), but must be distinguished from the more common glycogen hepatopathy as a cause of hepatomegaly and liver function ...
