[Effects of octreotide exposure during pregnancy in acromegaly](https://pubmed.ncbi.nlm.nih.gov/19769624)

<https://pubmed.ncbi.nlm.nih.gov/19769624>

An acute decrease in uterine artery **blood** flow was observed after octreotide injections, without affecting the **pregnancy** course, delivery, or foetal development. Octreotide concentrations were high **in maternal** serum and colostrum and lower in **umbilical cord** serum, amniotic fluid, and newborn serum.
