

Dear editor,

we sincerely appreciate your decision that our manuscript could be reconsidered for publication in the World Journal of Gastrointestinal Surgery. We performed the revision of the manuscript, made some changes and additions in the text according to the recommendations of the *Science editor*, since both Reviewers did not send any recommendations. ## Comments

Dear Editor, thank you very much for the positive respond to our manuscript. We appreciate your valuable remarks and comments that helped us to improve the manuscript. We have made necessary changes in the text according to the "Guidelines and Requirements for Manuscript Revision: Retrospective Study" and the "Format for Manuscript Revision: Retrospective Study" downloaded from your website.

In original manuscript, there was two references under the number "14", that was our mistake we apologies for. The total number of references is 31.

We provide the signed Conflict-of-Interest Disclosure Form and Copyright License Agreement.

We changed the title so that it is no more than 18 words now.

We added the "Author Contributions" section in manuscript.

We also provide the original figure documents, that were prepared and arranged using PowerPoint. The figure 2 was prepared by using SPSS software, so that figures can not be reprocessed in PowerPoint, but we additionally enlarged the legends on figures to rise their quality.

We hope that these revisions improve the paper.
