PEER-REVIEW REPORT

Name of journal: World Journal of Gastrointestinal Surgery

Manuscript NO: 68352

Title: Development and validation of a prediction model for deep vein thrombosis in older non-mild acute pancreatitis patients

Reviewer's code: 05207387

Position: Editorial Board

Academic degree: DSc, PhD

Professional title: Professor

Reviewer's Country/Territory: South Korea

Author's Country/Territory: China

Manuscript submission date: 2021-05-20

Reviewer chosen by: AI Technique

Reviewer accepted review: 2021-05-20 13:40

Reviewer performed review: 2021-05-25 13:35

SPECIFIC COMMENTS TO AUTHORS

Thank you for recommending me as a reviewer. This paper was aim to develop and validate a potential new prediction nomogram model for the occurrence of DVT in NMAP. Overall, this study is well written. If the authors complete minor revisions, the quality of the study will be further improved.   1. The introductory section is well written. If the author describes the research trends of NMAP and nomogram more specifically in the introduction section, it can help readers understand.   2. Page 4-5: Study Design and Participants: If the author explains the subjects (sampling, exclusion criteria, inclusion criteria) more specifically, it can help readers understand.
