

Newer variants of Progressive Familial Intrahepatic Cholestasis

We thank the editors for considering to accept our manuscript and giving us another opportunity to submit with revisions. We also thank the esteemed reviewers for their valuable inputs.

Please find the point-to-point responses to the reviewers below.

Dear Reviewer

We have incorporated the suggestions made by the reviewer. We are resubmitting the revised manuscript with changes

Reviewer 1:

The authors have made an interesting and complete review on progressive familial cholestasis which is enriched with very clear and illustrative images. The already complete review could be enriched by adding some information on mutations of the following genes that can be associated with cholestasis: - JAG1, NOTCH2: Alagille syndrome - SLC25A13: Citrullinemia - CLDN1: Ichthyosis, PSC, Alopecia and Leukocyte vacuoles

Response: We thank the reviewer for appreciating our work. We have now added some information on Alagille syndrome, Citrin deficiency and Neonatal ichthyosis sclerosing cholangitis syndrome in the differential diagnosis section as suggested by the reviewer.

EDITORIAL OFFICE'S COMMENTS

Authors must revise the manuscript according to the Editorial Office's comments and suggestions, which are listed below

1) Science editor:

(1) Scientific quality. The manuscript is within the scope of the journal and the scientific quality classification of the manuscript was good. a) Classification: Grade B; Summary of the Peer-Review Report: The authors have made an interesting and complete review on progressive familial cholestasis which is enriched with very clear and illustrative images. b) . However, this review needs major revision. c) Format: 4 figures and 4 tables. d) References: A total of 46 references are cited, including 27 references published in the last 3 years. e) Self-cited references: No Self-cited references

Response: Regarding the scientific quality, all points mentioned above have been adhered to.

- Number of references have been modified in R1
- There are five tables as table 1a, table 1b, table 2,3 and 4 and 4 figures

(2) Language evaluation: Classification: Grade B. (3) Academic norms and rules: the signed Conflict-of-Interest Disclosure Form and Copyright License Agreement is missing. The Institutional Review Board Approval Form and Written informed consent was waived. No academic misconduct was found by the Bing search. (4) Supplementary comments: This is an invited manuscript. No financial support was obtained for the study. The topic has not previously been published in the WJH. (5) Issues raised: (6) Re-Review: Not required. (7) Recommendation. minor revision.

Response:

- We have attached the signed Conflict of Interest disclosure form and Copyright License Agreement form
- We have revised the manuscript as per reviewer and editorial comments

(2) Company editor-in-chief:

I have reviewed the Peer-Review Report, full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Hepatology, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors.

Response: We have revised the manuscript according to Peer-Review report and Editorial Office's comments.
