SPECIFIC COMMENTS TO AUTHORS

Firstly, thank you for chance to review interested article. 1. The title was clear and reflect the main subject of the manuscript about choroidal metastatic mucinous abscess caused by *Pseudomonas aeruginosa*. 2. The abstract summarize and reflect the work described in the manuscript especially in diagnosis and treatment processes of a case of complex choroidal space-occupying lesion. 3. The key words reflect the focus of the manuscript. 4. The manuscript adequately describe the background, present status of the case, I suggested the authors described data gathering methods (from medical chart or interview or experience). Please give more information about patients (underlying, family history or previous condition). 5. In diagnosis and treatment (line 12) start with diagnosis from previous hospital, please brief explain for diagnosis in hospital. 6. The outcome of case was clear and easy to understand. 7. Illustrations and tables: I very concerned about Fig. 5 8 9 10 11 it's not good quality picture. 8. The manuscript cite appropriately but not the latest references. 9. I didn't see about ethic statements in this case report.

SPECIFIC COMMENTS TO AUTHORS

The authors report an interesting case of a metastatic mucinous abscess caused by *Pseudomonas aeruginosa*. The eventuality is not unique, but quite rare. The authors provide photographic documentation, which is outstanding apart from the histology. Histology should be provided on both low and high magnification to allow the reader truly appreciate the pathology.
