Role of endoscopic ultrasound-guided fine needle ...

<https://www.spandidos-publications.com/10.3892/etm.2016.3433> ▼

Abstract. **Endoscopic ultrasound-guided fine needle aspiration** (EUS-FNA) is an accurate technique for sampling the pancreas and mediastinum; however, limited data are available for other mass lesions. The aim of this study was to explore the value of EUS-FNA in the differential diagnosis of all mass lesions.

The aim of the present study was to evaluate the efficacy of **endoscopic ultrasound-guided fine-needle aspiration (EUS-FNA)** in diagnosing mediastinal and intra-abdominal lymphadenopathies. A total of 154 patients with mediastinal and intra-abdominal lymphadenopathies were included in this retrospective study between February 2010 and March 2015.
