Curative surgery for gastric cancer in the elderly...<https://www.ncbi.nlm.nih.gov/pubmed/18038881>

This consideration is important for the treatment decision-making for gastric cancer in the elderly. The aim of this study was to identify factors influencing mortality, morbidity, survival and quality of life after curative surgery for gastric cancer in patients aged 75 years ...

Minimally invasive surgery as a treatment option for ...<https://pubmed.ncbi.nlm.nih.gov/25480603>

MIS for gastric cancer may be performed safely and maintains the advantages of minimal invasiveness, even in extremely old patients. Furthermore, gastrectomy by either by MIS or open surgery can reduce gastric cancer-related deaths, even in patients 80 years or older.

Options in Stomach Cancer Treatments for the Elderly ...https://seniors.lovetoknow.com/Stomach_Cancer_Treatments_for_the_Elderly

A diagnosis of stomach cancer can be shocking for elderly patients. The most common stomach cancer treatments are surgery, chemotherapy, radiation, immunotherapy and targeted therapy. These forms of stomach cancer treatments for seniors may be performed separately or together depending on what your physician and oncologist recommend.

Chemotherapy in Elderly Patients with Gastric Cancer<https://www.jcancer.org/v07p0088.htm>

Jan 01, 2016 - For frail or vulnerable patients, however, monotherapy or only symptomatic treatment may be desirable. Targeted agents seem to be promising treatment options for elderly patients with GC, considering their better efficacy and less toxicity. Keywords: Gastric cancer, Chemotherapy, Elderly, Review, Introduction

Prognosis of elderly gastric cancer patients after surgery ...<https://link.springer.com/article/10.1007/s12032-018-1166-8>

Jun 19, 2018 - This study aimed to identify clinicopathological factors associated with the outcome of elderly patients with gastric cancer (GC), and to construct a nomogram for individual risk prediction. Tumor characteristics of 143 patients aged ≥ 80 years underwent surgery for GC were collected and analyzed by uni- and multivariate analyses. A prognostic nomogram was constructed using the factors ...
