

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Pediatrics*

Manuscript NO: 68818

Title: Tissue Doppler, speckling tracking and four-dimensional echocardiographic assessment of right ventricular function in children with dilated cardiomyopathy

Provenance and peer review: Invited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 04094127

Position: Editorial Board

Academic degree: MD, PhD

Professional title: Chief Physician, Full Professor

Reviewer's Country/Territory: China

Author's Country/Territory: Egypt

Manuscript submission date: 2021-06-04

Reviewer chosen by: Ze-Mao Gong

Reviewer accepted review: 2021-09-04 04:55

Reviewer performed review: 2021-09-04 12:37

Review time: 7 Hours

SPECIFIC COMMENTS TO AUTHORS

Right ventricular function is frequently overlooked during the evaluation of dilated cardiomyopathy. Razaky, et al. evaluate RV function in children with idiopathic DCM using relatively recent echocardiographic modalities. Their results showed that impairment of the RV global longitudinal strains and other systolic and diastolic parameters in children with DCM. It is a good story. 1, remove the colon from "Introduction:" 2, add a chart flow on the study design for better understanding the manuscript.
