

Dear editors and reviewers,

Thank you for your letter and for the reviewers' comments on our manuscript entitled "CT-guided chemical renal sympathetic nerve modulation in the treatment of resistant hypertension: a case report". All of these comments were very helpful for revising and improving our paper. The responses to the reviewers' comments are provided below.

If you have any further queries, please feel free to contact us.

Best Regards

Ming Yao

Comments 1: Dear Authors. Congratulations, Your work is very important in every day practice. Introduction of new diagnostic or therapeutic approach would contribute to the current knowledge of hypertension control. It will be very informative if you could measure in future works value of PWV and NGAL before and after RDN procedure.

Response: Thank you very much for your approval of our manuscript and clinical work. Besides, your suggestion is very meaningful, we will try to measure in future works value of PWV and NGAL before and after RDN procedure. Thank you again for your time and effort for this manuscript.

Thank you for the letter from the editors and reviewers again. Your recognition and help will inspire us to continue to innovate and make breakthroughs. If there are any questions, please contact us in time, thank you very much.
