## Editorial Office's Comments

Science Editor: 1 Scientific quality: The present paper depicts the evolution of clinical decision-making for patients affected by colorectal liver metastases, facing modern biomarkers and innovative opportunities that will characterize the evolution of clinical research and practice in the next few years. The topic is within the scope of the World Journal of Gastroenterology. (1) Classification: Grade C and Grade A; (2) Summary of the Peer-Review Report: Reviewer 1: The definition of biomarkers may be added in terms of Figure 1. More detailed explanation for application of AI as a biomarker shown in Figure 1 may be clarified. (3) Format: There are 2 tables and 2 figures; References: A total of 133 references are cited, including 42 references published in the last 3 years; (5) Self-cited references: There self-cited references. References recommendations: The authors have the right to refuse to cite references recommended by the peer reviewer(s), improper especially those published by the peer reviewer(s) him/herself (themselves). If the authors find the peer reviewer(s) request for the authors to cite improper references published by him/herself (themselves), please send the peer reviewer's ID number to editorialoffice@wjgnet.com. The Editorial Office will close and remove the peer reviewer from the F6Publishing system immediately. 2 Language evaluation: Classification: Grade A. A language editing certificate was provided. 3 Academic norms

and rules: the signed Conflict-of-Interest Disclosure Form and

	Copyright License Agreement was not provided. No academic	
	misconduct was found in the Google/Bing search. 4	
	Supplementary comments: This is an invited manuscript. The	
	topic has not previously been published in the WJD. 5 Issues	
	raised:The "Article Highlights" section is missing. Please add the	
	"Article Highlights" section at the end of the main text; 6 Re-	
	Review: Required. 7 Recommendation: Conditional acceptance.	
	Company Editor-in-Chief: I have reviewed the Peer-Review	
	Report, full text of the manuscript, and the relevant ethics	
	documents, all of which have met the basic publishing	
	requirements of the World Journal of Gastroenterology, and the	
	manuscript is conditionally accepted. I have sent the manuscript	
	to the author(s) for its revision according to the Peer-Review	
	Report, Editorial Office's comments and the Criteria for	
	Manuscript Revision by Authors.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are	[Y]
	avoided. The title does not start with 'The' and does not include	
	any Arabic numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first	
6	names are listed on the title page and are consistent with those	[Y]
	listed in the signed BPG Copyright License Agreement form.	

The 'Author contributions' passage describes the specific contribution(s) made by each author. The author's names are listed in the following format: full family (sur)name followed by abbreviated first and middles names.  e.g., "Wang CL and Liang L contributed equally to this work;  Wang CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript.  All authors have read and approve the final manuscript.  The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors.  The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title (e.g., MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.  The Manuscript Tracking information (i.e., Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.  The Abstract section is formatted according to the article-specific style (structured vs unstructured) and word count thresholds, as follows:  Commentary, Frontier, Diagnostic Advances, Medical Ethics, Minireview, Review, Therapeutics Advances, and Topic Highlight: Non-structured abstract that is no less than 150 words.			
listed in the following format: full family (sur)name followed by abbreviated first and middles names.  e.g., "Wang CL and Liang L contributed equally to this work;  Wang CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed the research; Xue JZ, and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and approve the final manuscript."  The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors.  The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title (e.g., MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.  The Manuscript Tracking information (i.e., Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.  The Abstract section is formatted according to the article-specific style (structured vs unstructured) and word count thresholds, as follows:  Commentary, Frontier, Diagnostic Advances, Medical Ethics, Minireview, Review, Therapeutics Advances, and Topic Highlight: Non-structured abstract that is no less than 200 words. structured abstract that is no less than 150 words.		Field of Vision, Case Report and Letter to the Editor: Non-	
		structured abstract that is no less than 150 words.	

	Research articles: Structured abstract with subsections for AIM (no	
	more than 20 words); METHODS (no less than 80 words);	
	RESULTS (no less than 120 words); and CONCLUSION (no more	
	than 26 words).	
	The 'Key words' list provides 5-10 keywords that reflect the main	
12	content of the study. The first letter of each keyword is capitalized,	[Y]
	and each keyword is separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The	
	name of the first author should be typed in bold letters; the family	
	(sur) name of all authors should be typed with the first letter	
	capitalized, followed by their abbreviated first and middle initials.	
13	For example, an article by Jae Moon Yoon, Ki Young Son, Chun	[Y]
	Sick Eom, Daniel Durrance, Sang Min Park will be written as Yoon	
	JM, Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	
	mellitus increases the risk of gastric cancer: A meta-analysis. World	
	J Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the	
14	study that outlines the most innovative and important arguments	F2/1
14	and core contents of the paper and will serve to effectively attract	[Y]
	readers.	
	The 'INTRODUCTION' section clearly describes the relevant	
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or	
15	defined, with the full name of abbreviations given upon first	[Y]
	appearance in the text and the abbreviation presented in	
	parentheses [i.e., "computed tomography (CT)"]. First-person	
	pronouns (e.g., 'I', 'we') are used appropriately to clearly indicate	
	the work performed by the author(s). When weaknesses of	
1	previous studies are described in the text to highlight the	

	innovations related to the current study, the information is presented carefully.	
16	The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.	[N]
17	The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.	[N]
18	Statistical symbols are accurate. Statistical significance is expressed as ${}^aP < 0.05$ , ${}^bP < 0.01$ ( $P > 0.05$ usually does not need to be denoted). If there are other series of $P$ values, ${}^cP < 0.05$ and ${}^dP < 0.01$ are used, and a third series of $P$ values is expressed as ${}^cP < 0.05$ and ${}^dP < 0.01$ . Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.	[N]

1	
The 'DISCUSSION' section (1) describes the main purpose and	
hypothesis of the study; (2) summarizes the most important	
results; (3) illustrates and explains the results (but does not simply	
repeat the data) and draws conclusions or inferences based on the	[NI]
results; (4) points out the limitations of the study and their impact	[ N ]
on the results, as well as proposes further advice on future	
research topic(s) or direction(s); and (5) describes the theoretical	
significance and practical value of the findings.	
The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
individuals or organizations for technical support (i.e., providing	
instrumentation, equipment or experimental materials, and/or	ENTI
assistance in experimental work), non-technical services (i.e.,	[ N ]
useful inspiration, suggestions, guidance, or review), and/or any	
other auxiliary work.	
The 'ARTICLE HIGHLIGHTS' section provides comments for	[NI]
original articles in accordance with the specified format.	[ N ]
The 'REFERENCES' section lists the references in the Vancouver	
style. This style uses Arabic numeral in-text citations based on the	
order of the first appearance of a source in the text. For citations	
where the author's name is indicated in the text, a superscript	
number should be placed following the name (i.e., "Pang et al").	
For citations where no author is indicated, a superscript number	
should be placed at the end of the sentence. Respective examples	[Y]
are: "Ma <sup>[1]</sup> reported", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a	
high sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the	
reference number is described in the text; for example, "The	
experimental method used has been described in reference [8]."	
The style of reference citations in tables is the same as that in the	
text (e.g., Pan et al <sup>[2-5]</sup> , please see reference [8]).	

Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version.  The number of cited references is appropriate for the article type, as follows:  Commentary: no less than 50;  Review; no less than 30/26;  Case Report and Letter to the Editor: no less than 1.  The ethics-related statements are provided in accordance with the manuscript type (e.g., Manuscript NoInstitutional review board statement, Manuscript NoAnimal care and use statement, etc.).  The names of the pere reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL).  The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, ×, +, +) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: Figure 1  Pathological changes in atrophic gastritis tissue before and after treatment. A:; B:; C:; D:; E:; F:  Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis diagrams, PCR amplification curves, and survival curves.

29	The author(s) highlighted the changes made to the manuscript	[Y]
2)	according to the peer-reviewers' comments.	[1]
30	The responses to the peer-reviewers' comments are consistent	[ \
30	with the changes made to the manuscript.	[Y]
	The revised manuscript is provided (file name: Manuscript No	
	Review; e.g., 870- Review).	
21	The letter of peer-reviewers' comments is provided (file name:	[ <b>V</b> ]
31	Manuscript NoPeer-review(s); e.g., 870-Peer-review(s)).	[Y]
	The response letter is provided (file name: Manuscript No	
	Answering reviewers; e.g., 870-Answering reviewers).	
	The related ethics and relevant documents are provided, such as	
	(1) Approved grant application form(s) or funding agency copy of	
	any approval document(s) (file name: Manuscript NoGrant	
	application form(s)); (2) Biostatistics review certificate (file name:	
	Manuscript NoBiostatistics statement); (3) Conflict-of-interest	
	statement (file name: Manuscript NoConflict-of-interest	
	statement); (4) Clinical trial registration statement (file name:	
32	Manuscript NoClinical trial registration statement); (5)	[Y]
	Institutional review board approval form or document (file name:	
	Manuscript NoInstitutional review board statement); (6)	
	Institutional animal care and use committee approval form or	
	document (file name: Manuscript NoInstitutional animal care	
	and use committee statement), and (7) Signed informed consent	
	form(s) or document(s) (file name: Manuscript NoInformed	
	consent statement).	
	All authors signed the BPG Copyright license agreement form (file	
33	name: Manuscript NoCopyright license agreement; e.g., 870-	[Y]
	Copyright license agreement).	
	The language certificate provided by authors who are non-native	
34	speakers of English meets the BPG requirements (file name:	[Y]
	Manuscript NoLanguage certificate; e.g., 870-Language	

	contificate)	
	certificate).	
	The photos licensed in the Agreement for Use of Personal Photos	
35	are consistent with those in the paper (file name: Manuscript No	[N]
	Agreement for use of personal photos; e.g., 870-Agreement for use	[1
	of personal photos).	
	This document (Checklist of Responsibilities for Scientific Editors)	
36	has been saved under the file name: manuscript NoScientific	[Y]
	editor work list (e.g., 870-Scientific editor work list).	
	A CrossCheck investigation (an effective tool for detecting	
	unoriginal content, enabling our editors to preserve the journal's	
	integrity and the authors' copyright) has been performed for the	
	manuscript via the website: http://www.ithenticate.com/. The	
	results document contains the following information for the	
	manuscript: "Name of journal", "Manuscript No.", "Columns",	
37	"Title" and "Author list". The Figure of the CrossCheck results is	[Y]
	saved in JPEG format (.jpg) at 1440 × 680 pixel resolution. The PDF	
	of the CrossCheck results has been saved under the file name:	
	manuscript No CrossCheck report (e.g., 870-CrossCheck report).	
	The Google searches have also been performed to further ensure	
	publication of original content.	
20	The text of the manuscript is typed in Book Antiqua font, 12 pt,	F 3 / 1
38	with 1.5 line spacing.	[Y]
	The primary responsibilities of our scientific editors include careful	ly checking the
Responsibilities	entire manuscript and all accompanying materials for: (1) errors in spelling,	
	grammar, punctuation and wording; (2) suitability of tables, figures, figure data	
of scientific	and legends; (3) accurate and appropriate presentation of symbols ( $e.g. +, -, \times, \div, \%$ ,	
editors		
	*) in tables and figures; and (4) complete and comprehensive r	evision of the
	manuscript according to the reviewers' comments.
