RE: Non-Native Speakers of English Editing Certificate

Dear Editor,

Attached please find a copy of our manuscript "Is precision medicine for colorectal liver metastases still a utopia? New perspectives by modern biomarkers, image mining analyses and artificial intelligence" submitted for publication in the World Journal of Gastroenterology.

This is an invited Frontier Article, Number 00505482.

The authors are Non-Native English Speakers, but they wrote several papers published in international peer-reviewed journals, and the manuscript has been written under the supervision of a Native English speaker. We kindly ask the Editor and reviewers to evaluate the manuscript in its present form. If required, we will then submit the manuscript to a certified agency for English language editing.

We thank the Editor for his kind cooperation

Best regards

Luca Viganò, MD, PhD
