SPECIFIC COMMENTS TO AUTHORS

I reviewed Letter to editor 'Prevention of late complications of endoscopic resection of colorectal lesions with a coverage agent: Current status of gastrointestinal endoscopy'
The author is well documented about some shortcomings of the prevention of DB and DP with coverage agents after EMR or ESD. It's suitable for accepting. Minor There are typographical errors (non-amputated) in abstract and key words.

SPECIFIC COMMENTS TO AUTHORS

To authors, In the Abstract part, What does large non-Amputated Colorectal Lesions mean? Are the authors misspelling the word large non-pedunculated colorectal lesions? In the text 'to the editor', When other papers are marked as author et al, the author's last name is usually cited and the full name is not used. The authors will need corrections. (eg Lorenzo-Zúñiga, Vicente et al.) In the fourth paragraph of the main text, "We agree with Lorenzo-Zúñiga, Vicente et al., who reported that the routine use of prophylactic clipping does not reduce the risk of post-procedural bleeding overall and needs to focus on the economic efficiency ratio" The above sentence needs to be quoted again. In the fourth paragraph of the main text, What does non-truncated lesions mean? Doesn't that mean non-pedunculated here too? Where is Figure 1 cited in the text? Suddenly, a figure enters without explanation. The abstract, core tip, and conclusion of the text are all expressed in slightly different expressions, so it is not clear what the authors want to convey to the readers through this 'To the editor'. The authors will need to unify the point on this. Thanks.
