

Dear Editor,

We quite appreciate your favorite consideration and the reviewers' insightful comments concerning our manuscript entitled "Gastrointestinal symptoms as the first sign of chronic granulomatous disease in a neonate" (ID: 69383). We have studied the comments carefully and have revised the paper exactly according to the reviewers' comments. We hope this revision can meet with approval. The revised portions are marked in red in the paper and the main revisions corresponding to the reviewers' comments are as follows:

Reviewer #1:

Response: Thank you for your full affirmation of our article

Reviewer #2:

Response: Thank you for your positive comments on our manuscript. We have read the comments carefully and accepted the revision.

Reviewer #3:

Response: According to your nice suggestions, we have made corrections to our previous draft, the detailed corrections are listed below.

Response: 1. He was fed with formula milk. 2. Chest X-ray showed increased bilateral markings. Mild flatulence was evident on abdominal X-ray images. 3. Stool routine test showed normal. 4. Only 35 neonatal CGD cases have been reported in the English literature to date. The main clinical features included pneumonia or pulmonary abscess or pleural effusion, diarrhea, perianal abscess, skin infection, aspergillus infection and tuberculosis infection. I added a reference here and revised the reference number one by one. See the references below for details. 5. Diarrhea in this baby was a specific symptom of the CGD disease, but not a finding of concomitant infection. 6. Ultrasound examinations of the baby's abdomen and brain were performed, and the results were normal.

We have tried our best to improve the manuscript and made modification in the original manuscript according to the comments. These changes will not influence the content and framework of the paper. Here did not list all the changes but marked in red in revised manuscript.

Thank you and the review again for your help, and hope that the correction will meet with approval.

Best regards,

Li-hong Shang
