SPECIFIC COMMENTS TO AUTHORS

Dear authors; First of all, I would like to congratulate you on this beautiful case report and for you to have successfully treated the patient. Although NETs are rare, their incidence has increased significantly in parallel with the developments in imaging technologies in recent years. Primary hepatic NETs are rare, but when the literature is reviewed, there are many case reports on this subject. In fact, one of the similar cases was published in World J Gastroenterol in 2018. I do not think that the present case report will make an additional contribution to the literature. Sample case reports published in the literature in recent years are below. I wish you good work.
