

## PEER-REVIEW REPORT

**Name of journal:** *World Journal of Clinical Cases*

**Manuscript NO:** 70142

**Title:** Impact of failure mode and effects analysis-based emergency management on the effectiveness of craniocerebral injury treatment

**Provenance and peer review:** Unsolicited Manuscript; Externally peer reviewed

**Peer-review model:** Single blind

**Reviewer's code:** 06143469

**Position:** Peer Reviewer

**Academic degree:** MD

**Professional title:** Doctor

**Reviewer's Country/Territory:** Romania

**Author's Country/Territory:** China

**Manuscript submission date:** 2021-09-02

**Reviewer chosen by:** AI Technique

**Reviewer accepted review:** 2021-09-07 12:27

**Reviewer performed review:** 2021-09-20 12:00

**Review time:** 12 Days and 23 Hours

### **SPECIFIC COMMENTS TO AUTHORS**

Cranio-cerebral injury is complex, progresses rapidly, and has high disability and mortality rates. Failure to provide timely and effective intervention, may affect the effectiveness of subsequent interventions. The timely and effective emergency care affects the prognosis and recovery of patients with cranio-cerebral injury. Failure mode and effects analysis includes potential failure evaluation and analysis, and may be used to assess the consequences and implement interventions to address the occurrence of such failures. Use of failure mode and effects analysis has played an important role in the development of many disease interventions. This study explored the value of implementing an emergency management strategy that is based on failure mode and effects analysis theory using a group control format. The study is very interesting, but the manuscript requires a minor revision. Comments: 1. Some blanks between the words are missing, please check the manuscript carefully, such as, the “managementon” in the aim of the abstract, should be “management on”. 2. The study was designed as an observational study, not a retrospective study, please check it. 3. The limit of the study is not listed, and discuss, please add a short discussion. 4. Please edit the tables carefully.

### **SPECIFIC COMMENTS TO AUTHORS**

The authors reported an interesting study of the impact of failure mode and effects analysis theory-based emergency management on the effectiveness of craniocerebral injury treatment. The research was designed well, and the manuscript is well written. Only some typing errors should be corrected.
