- (1) We are sincerely grateful to the referee n°1 because of his/her approval of our review
- (2) We are sincerely grateful to the referee n°2 because of his/her approval of our review
- (3) We are sincerely grateful to the referee n°3 because of his/her approval of our review
- (4) We appreciated the critics of the referee n°4 and we hope that the suggestions of the other referees, which we integrated in our review may made him/her change his/her opinion.
- (5) We are sincerely grateful to the referee n°5 because of his/her approval of our review
- (6) We appreciated the critics of the referee n°6. We hope that the suggestions of the other referees which we integrated in our review, may help him/her in reconsidering the general logical organization of our review. Moreover, we stressed with appropriate sentences, our opinion about real novel findings.
- (7) We appreciated the critics of the referee n°7. We considered particularly useful his suggestions, because we do believe that they may contribute significantly to our review improvement. We added all suggested references and related comments, as suggest by him/her. We have to give a special thanks to him/her because of stressing the topic "GIST". It was not our purpose discussing novel findings about GIST, because we currently study gastric adenocarcinoma. In the abstract we mentioned that topic because we liked to highlight that during 10th IGCC it was discussed about GIST too. So, in the abstract, now we added a sentence declaring that novel findings about GIST, although in 10th IGCC, will not be discussed in our review. We corrected all mistyping
