

Dear Editor:

Thank you and the reviewers for your valuable suggestions. We have carefully read through the comments and made proper revisions. Our responses to the reviewer's questions are listed below. We greatly appreciate your time and efforts to improve our manuscript for publication.

Reviewer #1:

Response: We want to begin by thanking Reviewer #1 for writing that "the case report is good and well written. It is a really interesting paper." Thanks for your nice comments.

Science editor:

Response: Thank you very much for your advice. We have enriched the references to 31. All the modifications are marked as red.

Company editor-in-chief:

Response: We really appreciate your efforts and comments on our manuscript. We will submit the signed Informed Consent Form of treatment in Chinese. We also prepare the original figure documents using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed. We have revised the table as you required. Abbreviations used in the table are defined (separated by semicolons) directly underneath the table.

We hope that the revisions in the manuscript and our accompanying responses will be sufficient to make our manuscript suitable for publication in *World Journal of Clinical Cases*.

We shall look forward to hearing from you at your earliest convenience.

Sincerely yours,

Li-ping Yin
