SPECIFIC COMMENTS TO AUTHORS

The manuscript written by Xichun Zheng et al. observes the effect of precise nursing service mode on postoperative urinary incontinence prevention in patients with prostate disease. Postoperative urinary incontinence is the common complication affecting the quality of life, with a harmful influence on patients' bodies and minds. In this study, precise nursing service mode was applied to prevent postoperative urinary incontinence in patients with prostate disease, and it was found to shorten postoperative exhaust time, the time of indwelling catheter and hospitalization time, and the incidence of urinary incontinence. Very interesting study. And the manuscript is well written. The experiment of the study is designed very well, aims are very clear. Methods are reasonable. Data in the tables are very good, and well discussed. Thank you for giving opportunity to review your study.

SPECIFIC COMMENTS TO AUTHORS

I found the manuscript entitled “Effect of precise nursing service mode on postoperative urinary incontinence prevention in patients with prostate disease” original, very interesting, well-structured and with huge impact on real life practice. Precise nursing service mode is a novel nursing mode. In this interesting study, the authors found that the precise nursing service mode can reduce the incidence of postoperative urinary incontinence in patients with prostate disease; thus, it improves postoperative urodynamics and rehabilitation, and the patients’ quality of life. Comments/suggestions:

1. Title and key words - well chosen.
- 2-The abstract summarized and reflect the described in the manuscript.
3. Introduction contains the most important data to support the importance of the study. Some references could be included here.
4. Material and methods - the paragraphs are generally well structured and explained.
5. Results section is well and clearly presented with pertinent statistics.
6. Discussion paragraph could be expanded to underline the strength of this study and the potential limitations. Also, directions for future research could be discussed.
7. Good quality of the Tables.
8. References –appropriate, latest and important. However, the format of references should be modified.
