SPECIFIC COMMENTS TO AUTHORS

This case report demonstrated the importance of confirming the intubation tube with an ETCO₂ monitor after emergency tracheal intubation. It takes courage to report unexpected cases. I would like to commend the authors. This case report will definitely help train junior doctors and emergency physicians.

SPECIFIC COMMENTS TO AUTHORS

Right hemithorax expressions should be used instead of right thorax. After the first abbreviation, the expressions should be used as abbreviations, as for CT. In the case of pneumothorax, the expression "collapsed" rather than "condensed" would be more accurate for the lung. Is the collapsed lung ratio calculation made visually only? This ratio can be written with "approximately" expression or calculated precisely at the workstation.
