

## **Response to Reviewer's Comments**

Reviewer(s)' Comments to Author:

The case report a patient presenting with deep vein thrombosis and cerebral venous thrombosis with Eosinophilia being possible cause. Manuscript can be shortened especially the section of case report should be written in crisp fashion. The link between eosinophilia and venous thrombosis should be explained in detail.

1. Manuscript can be shortened especially the section of case report should be written in crisp fashion.

**Reply:**

Thank you for your valued comment. Accordingly, we have revised the case report to be as concise and clear as possible and shortened the manuscript. Regarding the key examination results, the development process of the disease, and related treatments, because the patient's condition is complicated, we intend to explain this to the readers in a manner that elicits understanding of the entire diagnosis and treatment process.

2. The link between eosinophilia and venous thrombosis should be explained in detail.

**Reply:**

Thank you for your valued comment. Accordingly, the description was added to the causes of VTE paragraph of the discussion section (please see page 12, 13).
