#### **SPECIFIC COMMENTS TO AUTHORS**

The manuscript is presenting the experience of a center in treating eosinophilic gastroenteritis in children. The study includes 22 patients diagnosed during a 3-year period. The paper is in general well written, using a quite good English, even that some corrections are needed. The structure of the paper is a correct one, beside that there is a combination of a study and 4 case reports (three of them with relapses). I would discuss the most important clinical aspects of the cases in Discussion and not presented them as short case-reports. The paper needs some editing corrections. In Table 1, for lab results I would not use "abnormal patients", probably better number of patients with values out of range or other way to define that. Also, mean albumin, or mean CRP level. There is a need to define the values % +/- SD, mean +/- SD as you did with n, %. I would include a section (paragraph) with the limitations of this study before the Conclusions section. The paper includes 26 references, 6 of them more recent (last 3 years).

#### **SPECIFIC COMMENTS TO AUTHORS**

Many mistakes highlighted in yellow and need correction and/or explanation. Need to add endoscopic and pathology photos

#### **SPECIFIC COMMENTS TO AUTHORS**

Dear Editor, Thanks to the authors for this good-organised retrospective study. The manuscript adequately describes the background, present status and significance of the study. Also, the current study interprets the findings adequately and appropriately. I think that it will contribute to the literature.
