SPECIFIC COMMENTS TO AUTHORS

Authors showed a case of augmentation cystoplasty with successful delivery and reviewed literatures. This report can bring some useful information for clinicians. But some new literatures were not reviewed. Authors should update the reference.

-------------------------------------	---

SPECIFIC COMMENTS TO AUTHORS

What was the parenchymal thickness of the right kidney? Right side hydronephrosis during pregnancy might be related to the hormonal effects of pregnancy and mechanical compression from the growing uterus. Was there any renal impairment on the right side? Operative technique is a bit detailed and I think needs to be summarized. What was the need to do augmentation so expeditiously? Why not decompress the system with nephrostomy and operate until after delivery?
