#### **SPECIFIC COMMENTS TO AUTHORS**

congratulations on your publication. I have found it interesting and with beautiful and complete iconography, both from the imaging tests and the endoscopic vision as well as the pathological one. Papillary necrosis is a pathology that we rarely have in our mind when doing an RIRS. Knowing it, it is possible that we detect it more often.

#### **SPECIFIC COMMENTS TO AUTHORS**

Well written good focused on Renal papillary necrosis with urinary tract obstruction. Findings of Flexible URSS are similar to pyelonephritis findings (fig 4 and fig 5) Authors could mention more and clarify these findings in discussion section.
