

This is to certify that Dr Naguy's MS titled- Therapeutic Use of Melatonin in Schizophrenia has been proof-edited by our in-house staff who are native English speakers with vast expertise in medical literature. This entails typically thorough proofreading, checking spelling, grammar, syntax, phrases, and word smithing. This has been provided for a discounted value of 40 USDs for basic editing. Company holds no legal liability for scientific content, though, which remains the lead author's ultimate responsibility.

This report was issued upon a request by the author.
