SPECIFIC COMMENTS TO AUTHORS

The paper reports midle thyroid vein tumor thrombous in PTMC. It shows the importance of surgical techniques and a form of early stage detection. The legend of the figures can be improved, placing arrows and identifications for better visualization. Figure 2 should be enlarged to allow identification of thrombosis. Most references are very old, and for some methodologies there are more current references (reviews). The subject is interesting and it is a description of a new case, which can help in the procedure for other cases.
