(1) *Science editor:*

This report describes a rare case of ocular dislocation in children. The manuscript is well written and can be helpful for the readers to ameliorate the diagnostic and therapeutic approach for this scenario. Nevertheless, there are a number of points that may deserve some revisions. 1. Without pictures, the author must provide valid pictures.

Respond: the valid pictures were offered.

2. In the "CASE PRESENTATION" section, it is suggested that chief complaints, history of present illness, history of past illness, personal and family history, physical examination, laboratory examinations, and imaging examinations should be described under a corresponding subheading according to the journal's requirements.

Respond: we have edited our paper according to the require of journal.

3. In the introduction, the incidence rate of epidemiology should be supplemented.

Respond: we are sorry that we didn't find the data about exact incidence rate of globe luxation.
