

**Reviewer #1**

- : 1. Thank you for your sincere advice.
2. After about a week of the ischemic stroke, the hyperacute stage passed and it was judged to be stable, and DCE-MRI was performed one week later. Since this study is a case study, DCE-MRI could not be checked with a perfect protocol. In the next study, we will supplement this part. Thank you very much.

**Reviewer #2**

- : 1. Thank you for your sincere advice.
2. I totally agree with you that a case report cannot draw conclusions. We will conduct better research with more cases.
