SPECIFIC COMMENTS TO AUTHORS

To whom it may concern, Good day. It is an interesting case. However, it needs grammatic and spelling correction. The discussion is missing some references. The discussion part is short, could you elaborate more? For example, about imaging to diagnose pleural effusion, axillary lymph node? Scintigraphy in lower limbs? Is there is any role of axillary lymph node biopsy in diagnosis? Thank you

In this manuscript, the authors report a case of yellow nail syndrome (YNS) accompanied by nephrotic syndrome (NS). This case report is clinically useful. However, the following points need to be addressed. Major comment: The relationship between YNS and NS is not clear in the manuscript. Therefore, the authors should describe the pathogenesis of NS. Minor comment: The authors should show the clinical course, including the treatment, in a Figure.
