SPECIFIC COMMENTS TO AUTHORS

Overall, the authors present a very interesting case of cuff leak due to inadvertent damage to the Endotracheal tube cuff leading to significant leak and how the anesthesia team used innovative ideas to improvise and fix the leak preventing re-intubation and other complications. While the case is novel and warrants publication, the English language and Grammar requires significant polishing and correction. In "case presentation" the following line needs to be corrected, ". Fifteen minutes into the operation, the anesthesia machine suddenly emitted a low voltage alarm" Instead of low-voltage alarm, would recommend saying, anesthesia machine alarm suggesting a low tidal volume. While the images supplement the case report nicely, it would be nice to show an illustration as to where the damage to the endotracheal tube happened as it appears it was the inflating tube that was damaged rather than the cuff itself.

SPECIFIC COMMENTS TO AUTHORS

Very well described very rare event which could end with patient death. As author stated accidentally cutting of the cuff on the endotracheal tube during the operation posed a significant threat to the patient's life. Intraoperative damage of the inflating cuff of the endotracheal tube has been rarely reported in the literature. It is very important to bring to consciousness seriousness of situation like this so I think readers will value this article in a way of help in everyday OR situations.

SPECIFIC COMMENTS TO AUTHORS

The study is aimed to report an emergency repair of a cut endotracheal tube inflating cuff. The title is "Perianesthesia emergency repair of a cut endotracheal tube inflating cuff:A case report". 1. This is a case report. 2. Several factors influence the outcome of the management. Please discuss these. 3. Please add more details of the complications of this technique. 4. Please review the literature and add more details in the discussion section. 5. What is the new knowledge of the article? 6. Please recommend to the readers "How to apply this knowledge?".
