

Dec. 18, 2021

Professor Dennis A Bloomfield,

World Journal of Clinical Cases Editor-in-Chief

Dear Professor Bloomfield:

I wish to re-submit the manuscript titled entitled “Ultrasound-guided rectus sheath block for anterior cutaneous nerve entrapment syndrome after laparoscopic surgery: A case report (NO:72470)”. The manuscript has been rechecked and the necessary changes have been made in accordance with the suggestions.

Thank you for your consideration. I look forward to hearing from you.

Sincerely,

Joho Tokumine, MD. PhD

Reviewer #1:

Scientific Quality: Grade B (Very good)

Language Quality: Grade A (Priority publishing)

Conclusion: Minor revision

Specific Comments to Authors: The conclusion should be more refined and highlight the core content of the article

Thank you for your comments. We revised the text.

Reviewer #2:

Scientific Quality: Grade B (Very good)

Language Quality: Grade A (Priority publishing)

Conclusion: Accept (General priority)

Specific Comments to Authors: There are more and more patients with anterior cutaneous nerve entrapment syndrome. Ultrasound-guided rectus sheath block is a new method with less trauma and good effect. This method is worth using for reference.

Thank you very much.
