SPECIFIC COMMENTS TO AUTHORS

This is an excellent case history of a rare occurrence - metastatic breast cancer in a male. Could you add some discussion about the possible connection to this patient's previous prostate cancer? Did you receive permission from the patient's next of kin to publish the case? Were you able to disguise the person's identity?

SPECIFIC COMMENTS TO AUTHORS

This case report is relatively rare. I have some questions. 1. In the discussion section, there are a few descriptions of this patient, What inspiration does this rare case give the author? 2. According to the article, the patient was old and had a poor cardiopulmonary function. Why did the author choose surgical treatment when the man had poorly differentiated breast cancer with lung metastasis? What were the reasons for choosing radiotherapy in the later stage?
