SPECIFIC COMMENTS TO AUTHORS

In the present letter Wang et al commented on a paper already published on World Journal of Gastroenterology, about the relationship between obesity, H. pylori, anemia and small bowel ulcers. All raised points are shareable. My only suggestion concerns reference list. Only one cited paper is too few, Authors must cite other papers to support the discussion.

SPECIFIC COMMENTS TO AUTHORS

This paper is very interesting because analyzes the different causes related with the finding of asymptomatic small intestine ulcerative lesions and the authors find that the main factors are obesity and presence of *Helicobacter Pylori* infection
