PEER-REVIEW REPORT

Name of journal: *World Journal of Orthopedics*

Manuscript NO: 72866

Title: Epidemiology of pelvic and acetabular fractures across 12-mo at a level-1 trauma centre

Provenance and peer review: Invited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 05424419

Position: Editorial Board

Academic degree: MD

Professional title: Assistant Professor

Reviewer's Country/Territory: Turkey

Author's Country/Territory: United Kingdom

Manuscript submission date: 2021-12-18

Reviewer chosen by: AI Technique

Reviewer accepted review: 2022-01-03 11:06

Reviewer performed review: 2022-01-04 08:14

Review time: 21 Hours

Scientific quality	[ ] Grade A: Excellent [ ] Grade B: Very good [Y] Grade C: Good [ ] Grade D: Fair [ ] Grade E: Do not publish

SPECIFIC COMMENTS TO AUTHORS

You have written the article very fluently. I've never been bored while reading

SPECIFIC COMMENTS TO AUTHORS

The study is a novel study and the authors have brought out this well. The authors have described the young and bugress classification but not the Letornel and judets distribution of acetabular fracture. An injury severity score and pattern of the pelvi-acetabular injury could be interesting.
