SPECIFIC COMMENTS TO AUTHORS

Dear Authors, I've read your article entitled "Ovarian mucinous tumor with mural nodules of anaplastic carcinoma: clinicopathological analysis of three cases report and literature review" with great interest. In my opinion you have address an uncommon clinical presentation of ovarian cancer. Thus, your article is of interest. I would recommend to add the Microsatellite instability status if available, and I would like to recommend to include the CT scan report evaluating the disease after the chemotherapy to understand whether or not the tumor had response. Congratulations

SPECIFIC COMMENTS TO AUTHORS

I have read the present manuscript with great interest. A major issue is that the present manuscript is focusing on pathology aspects of the subject without clinical informations, treatment strategies and prognosis details. More specific: 1. In abstract please add and other clinical information in case summary not only the pathology findings. 2. I am not sure that the conclusion of the abstract is the right point. 3. In introduction add an extra paragraph only with the aim of the study...."In this study..." 4. In case B. Please clarify the "B-mode U/S) 5. I recommend to describe cases in Case Presentation by case. 6. Discussion section needs information about the prognosis and treatment management of these tumors.
