To whom it may concern,

It's my great pleasure to provide this letter of support and endorsement for Dr. Xian Li's research work. I am a laboratory clinician and statistician working at the Affiliated Hospital of Inner Mongolia Medical University. As a researcher in the fields of laboratory medicine and epidemiology with over 60 publications (<https://www.researchgate.net/profile/Zhi-De-Hu-2>), I have reviewed the study design and statistical methods of Dr. Li's work, in which the pathogenic role of CENPK in colorectal cancer was investigated. This is a well-designed study with correct statistical analyses. I believe I am in the right position to support her work.

Sincerely,

Zhi-De Hu, M.D
