

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 73198

Title: Laparoscopic repair of diaphragmatic hernia associating with radiofrequency ablation for hepatocellular carcinoma: A case report

Provenance and peer review: Unsolicited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 03537453

Position: Editorial Board

Academic degree: MD

Professional title: Chief Doctor, Professor

Reviewer's Country/Territory: China

Author's Country/Territory: Japan

Manuscript submission date: 2021-11-15

Reviewer chosen by: Qi-Gu Yao (Online Science Editor)

Reviewer accepted review: 2022-02-25 15:39

Reviewer performed review: 2022-02-28 09:41

Review time: 2 Days and 18 Hours

SPECIFIC COMMENTS TO AUTHORS

Strengths: As a case report and literature review, it was well written. Weaknesses: Some concerns are listed below. Page 1: The title may be changed as "Laparoscopic repair of an iatrogenic diaphragmatic hernia after radiofrequency ablation for hepatocellular carcinoma: A case report and literature review" or "Laparoscopic repair of a diaphragmatic hernia associating with radiofrequency ablation for hepatocellular carcinoma: A case report and literature review", to make it more clear. Page 3, Page 4 and Page 17: The "Conclusion" and the last sentence of the "Core tip" in Page 4 and the last sentence of in Page 17 may be changed as: Laparoscopic treatment of iatrogenic diaphragmatic hernia is effective and minimally invasive. For it's not a first report procedure, it had been used in many cases, so "feasible" is not adequate. Page 6: Although RFA is promoted as a stable technique with low morbidity, several complications have been identified. The word "morbidity" is not adequate. Page 8: Magnetic resonance imaging (MRI) with gadoxetate sodium had better be Gadoxetate sodium enhanced magnetic resonance imaging (MRI) . Page 15: Of "organs dysfunction observed during this condition [28]." . How to understand it.
