SPECIFIC COMMENTS TO AUTHORS

The authors present an interesting case. Before accepting the manuscript for publication, please consider the following aspects: -please thoroughly spell-check the manuscript. Multiple typos (abstract: foLdaparinux, key words: Eltrombopa and multiple further passages) -what are thrombolic genes? -citation 22 is invalid

SPECIFIC COMMENTS TO AUTHORS

The authors present the case of a patients with MDS who developed DVT and was successfully treated with LMWH and eltrombopag due to co-existing thrombocytopenia in the setting of DVT. In addition, the patient had protein S deficiency which favours the development of thrombosis. The case is interesting particularly due to the treatment challenges in MDS with thrombocytopenia + DVT. The paper would require a moderate polishing of the scientific writing. For example: - Thrombopenia should be replaced with thrombocytopenia. - Thromobolic genes? Do you mean thrombophilia-associated genes? - Genetic genes? Please check this sentence. You should also discuss the possibility that the DVT was drug-induced, as some of the drugs taken by the patient were prothrombotic. Are you sure that other LMWH have not been used to treat thrombosis in MDS? Please check the literature. In addition, the references are very old. Please add references from the last 3-5 years, a lot of research has been conducted in the field of MDS, DVT etc. The references are not formatted per the journal's requirements.
