SPECIFIC COMMENTS TO AUTHORS

In this article, the authors presented a case report of the bone marrow metastasis of colon cancer with sepsis as the primary manifestation. It is an interesting article. However, there are some concerns about this article. 1. The authors explain that the thrombocytopenia reflects the etiology of sepsis. However, the fundamental relationships of bone marrow metastasis and sepsis are unclear, which is the weak point in this article. 2. Mini abstract is to be Core Tips. 3. Figure 1 and 2 are missing. 4. The references are small and not updated. 5. The authors explain that they overlooked the CT findings. Please present CT findings as Figure with arrows.
