#### **SPECIFIC COMMENTS TO AUTHORS**

it is an interesting review, however since it is about monitoring the ways available for monitoring should be highlighted in each therapeutic agent (ie drug traffic levels, total antibodies etc) and which is the clinical utility of those approaches in therapy prediction

#### **SPECIFIC COMMENTS TO AUTHORS**

Page 3: "TNF inhibitors available to patients for treatment of active IBD" perhaps change with the phrase "TNF INHIBITORS AVAILABLE FOR TREATING ACTIVE IBD". The sentence next to this is also hard to understand "Studies have confirmed that there is a correlation between clinical response and serum (laboratory studies??) trough levels of anti-TNF agents."
