### **SPECIFIC COMMENTS TO AUTHORS**

Dear Authors, we appreciate the scientific quality of the paper and of the literature review. We strongly suggest an overall grammar check for the language, that could be consistently improved. Some minor revision are listed by line: pag 3 line 27: check the spell for typos ( ...follow-up is also necessary for paatients). pag 4 line 2 - 3: grammar check of the sentence (i.e. "recurrence rate" instead of recurrent rate) pag 4 line 7: check "recurrent rate" pag 5 line 23: check "quited" We suggest to discuss about the indications of preoperative biopsy and the decision for upfornt surgery. Preop biopsy is mandatory for exta-axial deep masses, according to present guidelines (ESMO). Wich are the indications for a intracranial mass? We suggest to point out that the histopatological diagnosis was done by an expert pathologists. Present guidelines state that diagnosis of STS have to be done by expert pathologists - or confirmed by pathological revision of the specimen. We suggest to discuss about the importance of a multidisciplinary management of STS - and overall, of ultra-rare tumours. Was this case discussed in a multidisciplinary tumour board?
