PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 73960

Title: Treatment of pyogenic liver abscess by surgical incision and drainage combined

with platelet-rich plasma: A case report

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 05395420 Position: Editorial Board Academic degree: MS, PhD

Professional title: Assistant Professor

Reviewer's Country/Territory: India

Author's Country/Territory: China

Manuscript submission date: 2021-12-17

Reviewer chosen by: AI Technique

Reviewer accepted review: 2021-12-17 13:08

Reviewer performed review: 2021-12-17 13:23

Review time: 1 Hour

Scientific quality	[] Grade A: Excellent [] Grade B: Very good [] Grade C: Good [Y] Grade D: Fair [] Grade E: Do not publish
Language quality	[] Grade A: Priority publishing [] Grade B: Minor language polishing [Y] Grade C: A great deal of language polishing [] Grade D: Rejection
Conclusion	[] Accept (High priority) [] Accept (General priority) [] Minor revision [Y] Major revision [] Rejection
Re-review	[Y]Yes []No

SPECIFIC COMMENTS TO AUTHORS

Dear Authors I congratulate you for the attempt to bring up the case for publication. I have few concerns before suggesting your article for publication. 1. The case summary part of the abstract needs to be revised for language errors 2. cold medicines avoid such terms 3. locate the lesion to the organ upon description 4. History of presenting illness needs to be revised for language errors 5. Treatment part needs to be rejected for language errors 6. Conclusion needs to be revised to prevent generalisation

SPECIFIC COMMENTS TO AUTHORS

This is a very valuable case report, describing the first clinical application of platelet rich plasma in a patient with a liver abscess. Therefore, it absolutely deserves publication. However, the discussion chapter needs to be broadened as there are several reports of application of PRP in the experimental setting which explore its effects on the regeneration of liver tissue. These reports have to be mentioned and all of the aspects of the transition from the experimental setting to the clinic need to be analyzed in more detail.
