	General Information of the Manuscript	
	Name of journal: World Journal of Meta-Analysis	
	Manuscript NO.: 74227	
	Column: Meta-Analysis	
	Title: Evidence Analysis on the Utilization of Platelet-rich Plasma as	
1	an adjuvant in the repair of Rotator Cuff Tears - Systematic	[Y]
	Overview of Overlapping Meta-analyses	
	Authors: Sathish Muthu, Naveen Jeyaraman, Keval Patel,	
	Girinivasan Chellamuthu, Vibhu Krishnan Viswanathan, Madhan	
	Jeyaraman and Manish Khanna	
	<b>Reviewer code:</b> 04643921, 05468112, 03850800, 05468066, and	

	05684808	
	First decision: 2022-03-13 22:44	
	Editorial Office's Comments	[Y]
	Science Editor: Specific Comments To Authors: In this manuscript,	
	the eligibility criteria was inaccurated and the conclusion is not	
	convincing. Furthermore, the scope of this manuscript is not aligned	
2	with the scope of our journal. Scientific Quality: Grade E	
	Language Quality: Grade C Recommendation: Rejection	
	Company Editor-in-Chief: I recommend the manuscript to be	
	published in the World Journal of Clinical Cases.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	[Y]
4	not too long (no more than 18 words). Words such as 'exploration',	
	'research', 'analysis', 'observation', and 'investigation' are avoided.	
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first	[Y]
6	names are listed on the title page and are consistent with those	
	listed in the signed BPG Copyright License Agreement form.	
7	The 'Author contributions' passage describes the specific	[Y]
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang	
	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	
	research study; Wang CL, Zou CC, Hong F and Wu XM performed	
	the research; Xue JZ and Lu JR contributed new reagents and	

	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and approve the final manuscript."	
8	The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors.	[N]
9	The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title ( <i>e.g.</i> , MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.	[Y]
10	The Manuscript Tracking information ( <i>i.e.</i> , Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.	[Y]
11	The Abstract section is formatted according to the article-specific style (structured <i>vs</i> unstructured) and word count thresholds, as follows: <u>Commentary, Frontier, Diagnostic Advances, Medical Ethics,</u> <u>Minireview, Review, Therapeutics Advances, and Topic Highlight</u> : Non-structured abstract that is no less than 200 words. <u>Field of Vision, Case Report and Letter to the Editor</u> : Non-structured abstract that is no less than 150 words. <u>Research articles</u> : Structured abstract with subsections for AIM (no more than 20 words); METHODS (no less than 80 words); RESULTS (no less than 120 words); and CONCLUSION (no more than 26	[Y]

	words).	
	The 'Key words' list provides 5-10 keywords that reflect the main	[Y]
12	content of the study. The first letter of each keyword is capitalized,	
	and each keyword is separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The	[Y]
	name of the first author should be typed in bold letters; the family	
	(sur) name of all authors should be typed with the first letter	
	capitalized, followed by their abbreviated first and middle initials.	
13	For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick	
	Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,	
	Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	
	mellitus increases the risk of gastric cancer: A meta-analysis. World J	
	Gastroenterol 2019; In press	
14	The 'Core tip' provides a summary (less than 100 words) of the	[Y]
	study that outlines the most innovative and important arguments	
	and core contents of the paper and will serve to effectively attract	
	readers.	
	The 'INTRODUCTION' section clearly describes the relevant	[Y]
	background information for the study. Only the most relevant and	
15	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
	with the full name of abbreviations given upon first appearance in	
	the text and the abbreviation presented in parentheses [i.e.,	
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	

16       describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.         17       The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either         17       the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.         18       Statistical symbols are accurate. Statistical significance is expressed as °P < 0.05, <sup>b</sup> P < 0.01 (P > 0.05 usually does not need to be denoted). If there are other series of P values, $P < 0.05$ and $^4P < 0.01$ are used, and a third series of P values is expressed as $^oP < 0.05$ and $^{i}P < 0.01$ . Statistical data is expressed as mean ± SD or mean ± SE.         19       The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.         19       The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support ( <i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or			
16       presented in the article and is adequate for a reader to repeat the study.         The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either       [Y]         17       the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.         18       Statistical symbols are accurate. Statistical significance is expressed as *P < 0.05, *P < 0.01 (P > 0.05 usually does not need to be denoted). If there are other series of P values, *P < 0.05 and *P < 0.01 are used, and a third series of P values is expressed as *P < 0.05 and *P < 0.01. Statistical data is expressed as mean ± SD or mean ± SE.	16	The 'MATERIALS AND METHODS' section clearly and accurately	[Y]
19       presented in the article and is adequate for a reader to repeat the study.         The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either       [Y]         17       the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.         18       Statistical symbols are accurate. Statistical significance is expressed as $^{aP} < 0.05$ , $^{bP} < 0.01$ ( $P > 0.05$ usually does not need to be denoted).         18       If there are other series of $P$ values, $cP < 0.05$ and $^{4P} < 0.01$ .         Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.         19       The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.         19       The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support ( <i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or		describes all materials and methods used to obtain the data	
17       The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.       [Y]         18       Statistical symbols are accurate. Statistical significance is expressed as °P < 0.05, °P < 0.01 (P > 0.05 usually does not need to be denoted). If there are other series of P values, °P < 0.05 and °P < 0.01 are used, and a third series of P values is expressed as °P < 0.05 and 'P < 0.01. Statistical data is expressed as mean ± SD or mean ± SE.		presented in the article and is adequate for a reader to repeat the	
17experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.18Statistical symbols are accurate. Statistical significance is expressed as *P < 0.05, *P < 0.01 (P > 0.05 usually does not need to be denoted). If there are other series of P values, *P < 0.05 and 4P < 0.01 are used, and a third series of P values is expressed as *P < 0.05 and 4P < 0.01. Statistical data is expressed as mean ± SD or mean ± SE.[Y]19The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.19The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support ( <i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or		study.	
17       scientific significance are emphasized. Journal references have been verified to ensure that there are no [Y] duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of
duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of
references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinvin, with the first letter of
journals is spelled out using Chinese Pinvin, with the first letter of
journals is spelled out using Chinese Pinvin, with the first letter of
each word capitalized ( <i>e.g., Shijie Huaren Xiaohua Zazhi</i> ); the name of
journals in other languages are listed according to indexing
information retrieved from Google. Book references are presented
with all the information relevant to the electronic version.
The number of cited references is appropriate for the article type, as [Y]
follows:
<u>Commentary:</u> no less than 50;
24 <u>Review:</u> no less than 100;
Article: no less than 30/26;
Case Report and Letter to the Editor: no less than 1.

The ethics-related statements are provided in accordance with the	[Y]
manuscript type (e.g., Manuscript NoInstitutional review board	
statement, Manuscript NoAnimal care and use statement, etc.).	
The names of the peer reviewers and the scientific editor are present	[Y]
at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang	
JL).	
The order and numerical labeling of tables and figures is consistent	[Y]
with their appearance and presentation in the text. Symbols in	
tables (e.g., +, -, ×, $\div$ , *) correctly correspond to the definitions in the	
footnotes. Only one legend is provided for each multi-panel figure	
consisting of color graphs, black and white graphs, or line graphs	
that depicts data of the same theme. For example: Figure 1	
Pathological changes in atrophic gastritis tissue before and after	
treatment. A:; B:; C:; D:; E:; F:	
Split pictures include flow charts, line graphs, histograms, and	[Y]
graphs including text. Unsplit pictures include meta-analysis	
diagrams, PCR amplification curves, and survival curves.	
The author(s) highlighted the changes made to the manuscript	[Y]
according to the peer-reviewers' comments.	
The responses to the peer-reviewers' comments are consistent with	[Y]
the changes made to the manuscript.	
The revised manuscript is provided (file name: Manuscript	[Y]
NoReview; <i>e.g.</i> , 870- Review).	
The letter of peer-reviewers' comments is provided (file name:	
Manuscript NoPeer-review(s); e.g., 870-Peer-review(s)).	
The response letter is provided (file name: Manuscript	
NoAnswering reviewers; <i>e.g.</i> , 870-Answering reviewers).	
The related ethics and relevant documents are provided, such as (1)	[Y]
Approved grant application form(s) or funding agency copy of any	
approval document(s) (file name: Manuscript NoGrant application	
	manuscript type (e.g., Manuscript NoInstitutional review board statement, Manuscript NoAnimal care and use statement, etc.). 	approval form or document (file name: Manuscript	
	NoInstitutional animal care and use committee statement), and (7)	
	Signed informed consent form(s) or document(s) (file name:	
	Manuscript NoInformed consent statement).	
	All authors signed the BPG Copyright license agreement form (file	[Y]
33	name: Manuscript NoCopyright license agreement; e.g.,	
	870-Copyright license agreement).	
	The language certificate provided by authors who are non-native	[Y]
34	speakers of English meets the BPG requirements (file name:	
	Manuscript NoLanguage certificate; <i>e.g.</i> , 870-Language certificate).	
	The photos licensed in the Agreement for Use of Personal Photos	[Y]
25	are consistent with those in the paper (file name: Manuscript	
35	NoAgreement for use of personal photos; e.g., 870-Agreement for	
	use of personal photos).	
	This document (Checklist of Responsibilities for Scientific Editors)	[Y]
36	has been saved under the file name: manuscript NoScientific	
	editor work list (e.g., 870-Scientific editor work list).	
27	A CrossCheck investigation (an effective tool for detecting unoriginal	[Y]
	content, enabling our editors to preserve the journal's integrity and	
	the authors' copyright) has been performed for the manuscript via	
37	the website: http://www.ithenticate.com/. The results document	
	contains the following information for the manuscript: "Name of	
	journal", "Manuscript No.", "Columns", "Title" and "Author list".	
	1	

	The Figure of the CrossCheck results is saved in JPEG format (.jpg) at		
	1440 × 680 pixel resolution. The PDF of the CrossCheck results has		
	been saved under the file name: manuscript No CrossCheck report		
	(e.g., 870-CrossCheck report). The Google searches have also been		
	performed to further ensure publication of original content.		
20	The text of the manuscript is typed in Book Antiqua font, 12 pt, with	[Y]	
38	1.5 line spacing.		
	The primary responsibilities of our scientific editors include carefull	y checking the	
Responsibilities	entire manuscript and all accompanying materials for: (1) error	rs in spelling,	
-	grammar, punctuation and wording; (2) suitability of tables, figures, f	igure data and	
of scientific	legends; (3) accurate and appropriate presentation of symbols ( <i>e.g.</i> +, -, $\times$ , $\div$ , %, *) in		
editors	tables and figures; and (4) complete and comprehensive revision of t	he manuscript	
	according to the reviewers' comments.
