

PEER-REVIEW REPORT

Name of journal: World Journal of Radiology

Manuscript NO: 74303

Title: Investigation of coronoid process hyperplasia using Levandoski analysis on panoramic radiographs

Provenance and peer review: Invited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 00012278

Position: Peer Reviewer

Academic degree: PhD

Professional title: Professor

Reviewer's Country/Territory: China

Author's Country/Territory: Turkey

Manuscript submission date: 2022-01-19

Reviewer chosen by: AI Technique

Reviewer accepted review: 2022-02-10 12:16

Reviewer performed review: 2022-02-10 13:29

Review time: 1 Hour

SPECIFIC COMMENTS TO AUTHORS

This paper has some problems (see below) and is not acceptable for publication in the present form. Major points 1. Title: Inappropriate. Change accordingly. (There was only one case of CPH.) 2. Were there no other abnormalities than CPH in this series? 3. In my opinion, it is problematic to determine the frequency of the disease in one case. 4. English: To be revised. Minor points 1, Please define the inclusion criteria more clearly (P.3: Methods) 2.(P.3.L.64): Maxillofacial radiologist's experience in this field. Please describe his measurement variability more clearly. 3.(P.5, Results): Please describe the results seen in the CPH case in "Result".
