### **SPECIFIC COMMENTS TO AUTHORS**

Thank you for the opportunity to review this interesting case report “A case of dilated left ventricle with multiple outpouchings: a severe congenital ventricular diverticulum or left-dominant arrhythmogenic cardiomyopathy?”. Authors reported a case of LDAC, which is a rare form of arrhythmogenic RV cardiomyopathy. Such a rare case is suitable to publish in the World Journal of Clinical Cases. However, the entire manuscript requires further language and grammatic edits.

### **SPECIFIC COMMENTS TO AUTHORS**

In this case reports authors discuss about a 57 year old patient with LDAC. This is an interesting and challenging case. I have the following recommendations 1. Past medical history: modify to without any prior medical comorbidities or addictions 2. Family history: Premature sudden cardiac death in father at the age of 40. 3. Examination: Mention general appearance. Remove the fist line stating done after hospitalization. Mention first and second heart sounds, and mention about lack of signs of heart failure 4. The entire article is interesting but needs English editing 5. The images are interesting, would suggest better/ bigger images for clarity 6. Please mention about the challenging nature of the patients diagnosis and discuss factors favoring LDAC as compared to CVD
