### **SPECIFIC COMMENTS TO AUTHORS**

The authors have done a good effort of compiling this case report. The authors describe a interesting case of portal vein thrombosis post liver resection and highlight importance of early detection and treatment. The case report does not need any revision according to me

### **SPECIFIC COMMENTS TO AUTHORS**

The authors discuss a case of PVT after partial liver resection. The discuss prevention and treatment. Suggestions: 1- introduction and background in the abstract and article need to be redone. It need to discuss incidence of PVT after liver surgery and in patients with primary liver cancer in non cirrhosis patients. 2- article need to discuss guidelines and different society recommendations on non cirrhosis PVT. 3- the last paragraph in discussion about expert opinion need to be supported by case reports or evidence to support this expert opinion. Like when to use as a or warfarin. Why not LMwH? 4- the authors recommends prevention of PVT after liver surgery? I think it would be better to discuss the pro and cons of each approach. The need to justify preventive measures for rare cases.
