#### **SPECIFIC COMMENTS TO AUTHORS**

This work mainly reviews the atypical manifestations of pediatric AVH, and its corresponding natural history, other diseases that need to differentiate and treatment. As a quarter of AIH children show the atypical symptoms, it is very meaningful to summarize this content, which can provide empirical guidance for the clinical work. The manuscript is nice but suffers for the following issues: 1) Opinions or assertions should be supported by references, preferably some new papers. And there are few references directly related to AIH in the whole review with the consequence of the loss of credibility. 2) The figures are well done, but there are no relevant references. If any, please display. 3) The English expression can be more concise and easy to understand. If the above concerns are fully addressed, the manuscript could be accepted.

#### **SPECIFIC COMMENTS TO AUTHORS**

Thank you for the effort you did. The review is well written, the idea flow is smooth and accurate. However for citation is needed for major statements. The title is accurate The introduction is well constructed The body of the review is informative but needs more references to support many statements.
