

## PEER-REVIEW REPORT

**Name of journal:** *World Journal of Hepatology*

**Manuscript NO:** 74837

**Title:** Role of biliary complication in chronic graft rejection after living donor liver transplantation

**Provenance and peer review:** Invited Manuscript; Externally peer reviewed

**Peer-review model:** Single blind

**Reviewer's code:** 04015916

**Position:** Editorial Board

**Academic degree:** MD, PhD

**Professional title:** Professor

**Reviewer's Country/Territory:** China

**Author's Country/Territory:** United States

**Manuscript submission date:** 2022-01-08

**Reviewer chosen by:** AI Technique

**Reviewer accepted review:** 2022-01-18 02:17

**Reviewer performed review:** 2022-01-18 14:21

**Review time:** 12 Hours

#### SPECIFIC COMMENTS TO AUTHORS

1) you should remove this sentence that 'Generally, Factors exposing patients to higher odds for CGR include the number and gravity of acute rejection incidents, episodes of CGR that require re-transplantation and prolonged cold ischemia time. Further, patient-related factors like advanced donor age and constellations with male donors and female recipients play a crucial role. Lastly, genetically unrelated donors display higher risk of CGR compared to genetically related donors in living donor liver transplantation (LDLT)'. 2) what do you mean for sentence that ' We hereby acknowledge the histological and clinical challenges in differentiating between CGR and other causes of post-transplant cholangiopathy (PTC)'. is the post-transplant cholangiopathy a conclusion from CGR or cause ? I thing you firstly should emphasize.
