SPECIFIC COMMENTS TO AUTHORS

In this manuscript, the authors present a case of oculomotor nerve palsy (ONP) by PCA compression and conducted a literature review. This paper is well-written and straightforward. However, there are several corrections and revisions that need to be made. (1) CASE PRESENTATION Physical examination: In the sentence “The patient’s width of right palpebral fissure was significantly larger than that that of contralateral eye”, you would be better off removing duplicated words “that”. (2) DISCUSSION: 1) In the sentence “and we identified 43 cases[1,3,5,8-36] of oculomotor involvement attributable to isolated neurovascular conflict”, ref [37] is not included. 2) With regard to the sentence “while only 10 cases including the current case treated by MVD (Table 1)[1,8-16,37].”, Table 1 indicates 11 cases, which does not include the current case. Therefore, “while only 10 cases including the current case” seems to be inappropriate, and you should be replaced with something such as “while only 12 cases including the current case”. 3) The sentence “only 3 cases including the current case involved compressive effects by the simple neurovascular conflict without vascular variation or atherosclerotic changes” is likely to be inappropriate because a total number of cases is 4 after adding the current case. 4) In the sentence “the responsible vessels of other 7 cases[1,8-11,14-15] were confirmed to have atherosclerotic changes”, you can include ref [37] and revise “7 cases” to “8 cases”. (3) Figure legend: 1) Regarding the sentence “The representative axial (left) and coronal (right) T2-weighted image before surgery (M)”, “axial (right) and sagittal (left)” seems to be appropriate. 2) Regarding the sentence “The representative axial (C) and coronal (D) T2-weighted image at 3 months after surgery (N)”, “axial (right) and sagittal (left)” seems to be appropriate. 3) On T2-weighted image

(Figure 1M, N), you should show which object the yellow arrow points to (I think that the yellow arrow points to the right ON). (4) Table 1: 1) In the ref [Kojo et al. (1998)], I suggest to replace “Left PComA” by “Left PcomA”. 2) In the ref [Fukamj et al. (2018)], the authors should replace “Fukamj” by “Fukami”. 3) In the abbreviation section below Table 1, “OPN: oculomotor nerve pals” should be replaced by “OPN: oculomotor nerve palsy”. 4) You should list the references in Table 1 in order of publication date.

SPECIFIC COMMENTS TO AUTHORS

- The whole manuscript needs extensive grammar corrections (for example: At discussion: (... the medial trunk of the PCA when the it travels to the interpeduncular fossa)). - Re-phrase this sentence at discussion: (decompression of vascular will not provide fast relief of ocular symptoms)incomplete sentence. - You did not refer to the (yellow arrow) at the figure legends of Figure 1.
